Instructions:

You are required to construct a **mobile-responsive website** using the **jQuery Mobile framework** based on the given reference and the attached design sample (refer to the provided screenshot).

Main Source: <https://demos.jquerymobile.com/1.2.0/>

Objective

- To creatively apply **jQuery Mobile components** in building a mobile web application.
 - To design a **professional landing page** for "Jabatan Teknologi Maklumat & Komunikasi (JTMK)".
-

Task (CLO2: P4)

Construct a **mobile web landing page** that includes the following components:

1. Header Section

- Organization logo on the **left**.
- Navigation bar on the **right** with links: HOME, ABOUT, PROJECTS, and CONTACT.
- The header must be **sticky (fixed at the top)** on all pages.

2. Main Content Sections

a) HOME Page

- A large introduction section with:
 - Heading: **"HEY, MY NAME IS JTMK"**
 - Sub-heading describing JTMK:

"JTMK is the Department of Information and Communication Technology (JTMK) offering DDT courses (Diploma in Information Technology (Digital Technology)) at Seberang Perai Polytechnic (PSP)."

- A button labeled **"PROJECTS"** that links to the Projects page.

b) ABOUT Page

- Details about all group members, assuming these roles:
 - Head of Department
 - Program Head (Software Track)
 - Program Head (Network Track)
 - Program Head (Data Track)

- Each member's profile must include:
 - Passport-sized photo
 - Full name
 - Position
 - Contact number

c) PROJECTS Page

- Create a list of projects with:
 - Project titles
 - Images
 - Reports in PDF format (clickable and viewable)
- Content must be creative and meaningful.

d) CONTACT Page

- Include functional buttons/links for:
 - **Phone call** (using tel: link)
 - **Email** (using mailto: link)
 - **WhatsApp** messaging (using WhatsApp API link)

3. Footer Section

- At the bottom of every page, display centered text:

"Copyright © DDT4x S2 2024/2025. All rights reserved."

4. Additional: Social Media Sidebar (Floating on Left)

- Display clickable icons **vertically** for:
 - LinkedIn
 - GitHub
 - Twitter
 - YouTube
 - Instagram
- Dummy links (#) are acceptable.

Requirements

- Apply **jQuery Mobile components**:
 - Header/Footer
 - [Navigation Bar](#)
 - Buttons
 - Listviews
 - Responsive Layouts (Grids)
- Apply **Mobile Web Apps Architecture**:
 - Use roles, theming, and page management.
- Manipulate **Dialogs**:

- Apply dialog boxes where suitable according to creativity and page needs.
- Apply **Hosting Resources**:
 - **Local Hosting**: Host all files within the project folder (e.g., using FTP upload to web hosting like [000webhost](#), [InfinityFree](#), [GitHub Pages](#)).
 - **CDN Hosting**: Use appropriate CDN links for libraries (e.g., jQuery, jQuery Mobile).
- **Integrate** jQuery Mobile lab activities previously done in class wherever relevant.

Deliverables

- Submit the complete project files:
 - HTML, CSS (if applicable), jQuery Mobile files.
- Must be tested and function correctly in both **desktop browser** and **mobile view**.
- Include a brief **report** containing:
 - URL of the developed website
 - Full source code
 - Screenshots of each page in responsive view (both desktop and mobile)
- Submit as a **single compressed ZIP file**.

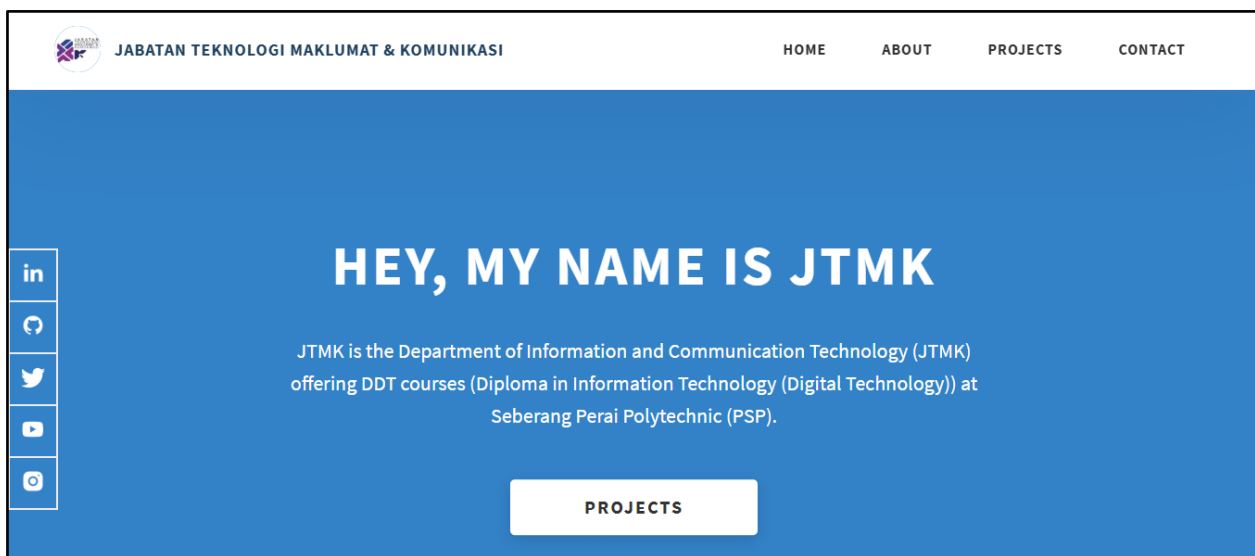

Figure X: Sample Outcome for Homepage (without applying jQuery Mobile components)
 This sample shows the homepage layout before integration of jQuery Mobile framework. It lacks mobile responsiveness, theming, and interactive jQuery Mobile elements.
